MEMORANDUM

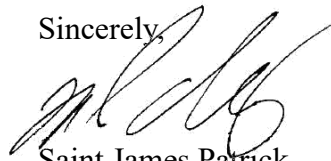

ATTN: Any and all individuals being subjected to forced electroshock treatments

It has come to my attention that many governments within the United States of America (and beyond) have religious freedom laws exempting individuals from involuntary psychiatric treatment in place similar to the State of Connecticut's C.G.S. Chapter 319i Sec. 17a-543(i).

As you may be required to provide evidence, allow this statement to serve as such: I, Reverend James Patrick Flannery hereby demand that all involuntary electroshock treatment procedures be halted in all lands, for we shall pray for the individuals being subjected to such measures – beginning now and forever beyond.

Please provide notice to your psychiatrist that although the Universal Life Church Monastery granted me the requisite authority to liberate the persecuted individuals held in mental health facilities spanning the globe from involuntary psychiatric treatment when they ordained me a minister under a non-denominational flag, belief in me alone is sufficient to receive my prayer.

Sincerely,

A handwritten signature in black ink, appearing to read 'J.P. Flannery', written in a cursive style.

Saint James Patrick

Minister, Universal Life Church Monastery
